

# Protect yourself but don't kill them!

They have never been more cute animals of the world, but that does not mean that we have to lead to extinction. Though it is very difficult to see with the presence of a human being the Cougar have a sweet side and very similar to a cat, incidentally they are, but only larger. So when you see a Cougar is we should turn away and let loose the human touch, above all with a puppy in there!
